Novel Coronavirus (2019-nCoV) – Information

Dear Sir or madam,

hereby we would like to inform you about the current status of the Corona Virus in Italy:

As announced by Prime Minister Conte at a press conference on March 21 2020, the measures and associated restrictions already adopted will be further tightened. This is unfortunately necessary, as the measures taken to date have not yet had the hoped-for effect and the number of infected and dead people continues to rise sharply every day.

All production sectors and plants, not classified as strategic or systemically important will be closed until at least April 03 2020.

The activities carried out by Intercable Tools srl has not been classified as strategic or systemically relevant, which is why we are unfortunately forced to follow the instructions of the public authorities and close our company until further notice. This concerns exclusively the Intercable Tools srl based in Brunico/Italy.

The ordered closure of our company is not a voluntary step, is not within our sphere of influence and therefore represents a case of force majeure, which we hereby formally notify you of. As long as the forced, officially ordered closure of our company will continue (currently until April 03, 2020 with the possibility of a further extension), we cannot fulfil our delivery commitments.

In the meantime, if possible, we will already take precautions to be able to restart production as soon as possible if the officially ordered closure of our company ceases to apply. We are closely monitoring all further developments. We will inform you immediately if the situation changes.

In urgent cases, please contact: CEO Kurt Mutschlechner: kurt.mutschlechner@intercable.com

With kind regards

INTERCABLE TOOLS srl
Kurt Mutschlechner
